

Faiz Ghanchi

SOFTWARE DEVELOPER

Dubai, UAE | +971 52 877 2549 | faizghanchi04@gmail.com

Profile

Backend Engineer with hands-on experience in Python, FastAPI, and AWS, specializing in developing scalable APIs, cloud infrastructure, and microservices. Proficient in designing high-performance backend systems, database management, and optimizing cloud-based deployments. Passionate about building secure and efficient server-side applications with modern technologies.

Experience

NEBE | Backend Engineer

June 2023 – June 2025

- Developed backend functionality using Python and FastAPI, contributing to the core RESTful API architecture.
- Supported Docker-based deployments, setting up environments to ensure consistency across development and production.
- Optimized PostgreSQL for database solutions, focusing on maintaining efficient data handling and storage.
- Participated in regular code reviews, incorporating feedback to improve code quality and learning best practices for maintainability and scalability.

Storage Scholars LLC | Backend Engineer

Feb 2023 – May 2023

- Developed backend APIs using Python and FastAPI, collaborating with frontend developers to ensure functional integration.
- Optimized PostgreSQL queries, contributing to more efficient data processing and response times.
- Implemented basic security measures to protect sensitive data and support application reliability.
- Handled performance tuning and backend optimization, helping the team achieve targeted performance goals.

Education

Middlesex University Dubai, MSc Network Management and Cloud Computing

2025-2026

Major: Network Management and Cloud Computing

GLS University, Bachelor's in Computer Application

2021-2024

Major: Computer Applications

Skills & abilities

Python, Flask, FastAPI, AWS, Golang, PostgreSQL, Docker, Git, Oracle Cloud, Microsoft Azure, NGINX, Apache, Kubernetes, MongoDB, CI/CD Pipelines, JWT, OAuth, Redis
